

HELP PREVENT Sheep Measles

Remember

- » Monthly dog treatments provide best protection
- » Home kill: freeze to -10°C for 10 days min, or thoroughly cook
- » Offal: freeze or cook as above
- » Check freezer temperature monthly
- » Home kill area must be dog-proof
 - » No untreated household scraps to dogs
 - » Dispose of dead stock in dog-proof sites
 - » Prevent dogs from roaming
 - » Ensure all foreign dogs are treated at least 48 hours before farm entry

**Monthly dosing
= Maximum protection**
