

GAME BIRD HUNTERS

Good keen man or woman, planning your next hunt?

Just remember the basic rules, so that you have fun, and the Farmer's livelihood is not compromised.

- 1. Always ask the Farmer** before going onto his land
- 2. All dogs need to be dosed** for Sheep Measles* at least 48 hours prior (or within a month) of going
- 3. Take a Certificate** from your Vet – not compulsory but it's a good idea – it may be the difference between land access or not
- 4. "Scoop your Poop!"** – as always, make sure you have enough bags for the job

Happy Hunting!

* Dosing for Sheep Measles is with a very reasonably priced Praziquantel Drug such as Droncit or Wormicide. Alternatively an All Wormer will also do the trick, and whilst more expensive, it will cover other parasites.

**Sheep Measles is prevented by dosing dogs.
It's that simple... AND IT'S CHEAP!**
